Subject: RE: September 2017 BCT ST012 regulatory call postponed

Eva

No slides are missing. As discussed in the August BCT conference call, several hydraulic containment wells had not been equipped with electrical and mechanical connections and tested for operational readiness. These electrical and mechanical connections were recently completed for the wells identified on the slide. The objective of the short-term pumping was to ensure that the pumps and connections were functioning properly at each well. The operational readiness for these wells was confirmed during the short-term pumping. Groundwater samples were collected from each well while operating and the analytical data will be presented once received from the laboratory. The short-term pumping test was conducted previously at other hydraulic containment wells with pumps when the connections were completed to verify operational readiness.

Don - is the pdf perhaps missing some slides? Slide 3 shows that pump tests were done on 3 containment wells, but there are no slides included describing what was done and why and the results. Eva

Subject: September 2017 BCT ST012 regulatory call postponed

The September BCT ST012 regulatory call at 1 pm pacific time on 9/26/2017 will be postponed until a later date. Slides will be issued to the team with site updates. The Air Force will be meeting internally to discuss the recent EPA and ADEQ letters on ST012 EBR.

The call tomorrow at 10 am pacific time (other sites) will occur as scheduled and materials will be distributed. Don Smallbeck will cancel the outlook invite for the 1 pm call.

Thank you.

Cathy
